

Who is SERA Hosting Services?

Last Updated Tuesday, 02 October 2007

Good question!

We are a small group of highly experienced Internet professionals, specializing in hosting, web, database, graphic design, systems and network maintenance, and consulting.

Our background experience includes a decade of Internet Services providing including all of the above services and dial up access, ISDN, DSL, wireless, and business grade T-1 services. We also have more than 30 years networking expertise, one-on-one and classroom instruction, consulting, database design, IT maintenance, computer sales and repair, and much, much more.

You might be wondering why we are limiting the services we are offer if we have such a versatile background in computers and the Internet. That, too, is an excellent question. After so many years of providing access, doing sales and repair, we felt that our talents could best be utilized if we scaled back the wide spectrum of services we are capable of and focused on the services our clients most desperately needed. Good design and hosting. And to provide unbiased consulting services to our clients for the other services they may need to maintain and grow their business. For example, by not selling computer systems, you can feel secure in what we recommend for your needs is truly the best for you, not what's best for us.

Our #1 priority is serving our client's interests to the best of our ability. If you are happy, we're happy and you will continue to utilize our service and knowledge because you know we have your best interests in mind.

Please feel free to email us if you have any questions not answered.
